

Snow and Ice Research Group – New Zealand: Monthly video seminar

Recent glacier dynamics at the outlets of Jostedalsgreen, West Norway Dr. Stefan Winkler, Dept. of Geological Sciences, University of Canterbury

The maritime glaciers of West Norway are amongst the best-studied glaciers around the world and show - to some extent - common properties with New Zealand glaciers regarding more recent chronologies. During the past two decades, in particular the larger outlet glaciers have experienced two distinct phases of different glacier dynamics. The most recent one still leaves some open questions. Alongside some of the available data, implications for the general interpretation of the most recent glacier dynamics will be presented.

Tuesday, 3rd August 2010, 1pm-1:50pm

All interested are welcome to attend.

Video meetings are held every month over the Access Grid. Video rooms are sited at most universities. The locations of the video conference rooms for each campus are:

Massey: Room 4.40, Social Sciences Tower, Massey University, Palmerston North.

Auckland: Room 429, SGGES (The School of Geography, Geology and Environmental Science), University of Auckland, Auckland.

Canterbury: Room 164, Level 1, Geography-Psychology Building, Canterbury University, Christchurch

Otago: Teaching Facilities South West corner, Information Services Building

Victoria: Library RB106

SIRG (<http://www.sirg.org.nz/>) operates as the New Zealand branch of the International Glaciological Society.
